

Fotospeed

for every print

Installing and using your custom Printer Profiles Instructions.

Photoshop and Lightroom

Fotospeed YouTube Channel

If you would like to see a video of these instructions we have also created free videos on the custom profiling process on our YouTube channel.

The screenshot displays the YouTube channel page for Fotospeed. At the top, a banner features the Fotospeed logo and the text "New Videos - Every Thursday". Below the banner, the channel name "Fotospeed" is shown with 677 subscribers and a "SUBSCRIBED" button. The navigation menu includes "HOME", "VIDEOS", "PLAYLISTS", "CHANNELS", and "ABOUT".

The "Uploads" section is active, showing a row of six video thumbnails with their titles and view counts:

- The Art of Composition with Charlie Waite** (57:06) - 177 views • Streamed 5 days ago
- Print Your Own Greeting Cards | FotoCards by...** (3:43) - 110 views • 1 week ago
- Kaiser LED Desktop Light for Photography & Videography** (4:52) - 145 views • 2 weeks ago
- De-Mystifying Black and White Printing 4pm** (48:24) - 223 views • Streamed 3 weeks ago
- Printing on Square Paper with Canon Pro 300 Printer** (9:26) - 177 views • 1 month ago
- SOFT PROOFING in PHOTOSHOP // Fotospeed...** (16:41) - 222 views • 1 month ago

The "Fotospeed - TUTORIALS" section is also active, showing a row of six video thumbnails:

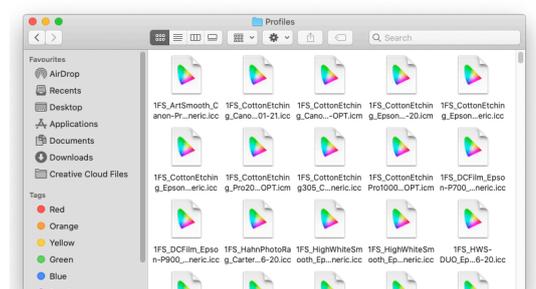

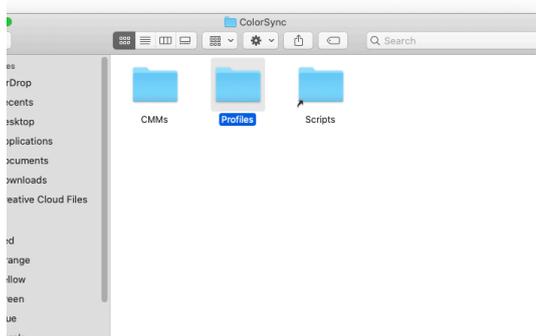

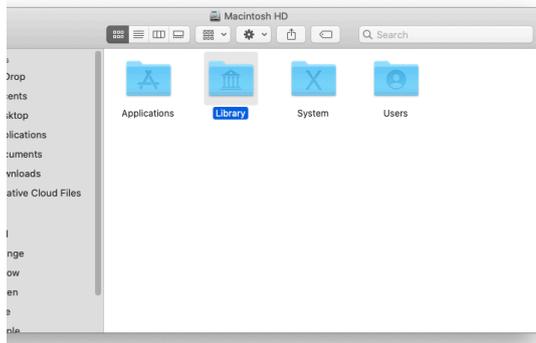

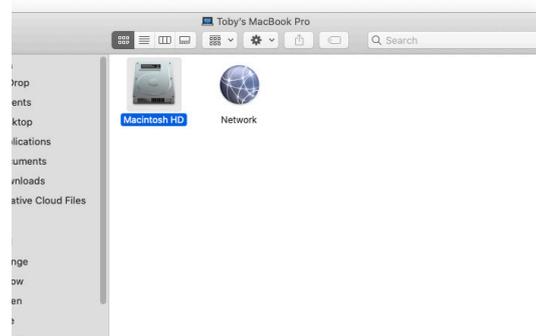

- SOFT PROOFING in PHOTOSHOP // Fotospeed...** (16:41) - 222 views • 1 month ago
- ICC Profiles and RENDERING INTENT when printing // ...** (8:57) - 258 views • 1 month ago
- Learn how to HARD PROOF Your Images in PHOTOSHO...** (13:30) - 332 views • 1 month ago
- Print a CUSTOM PROFILE CHART on a MAC // ...** (11:31) - 915 views • 10 months ago
- INSTALL Print Profiles on a PC // Fotospeed Tutorial** (1:40) - 470 views • 10 months ago
- INSTALL Print Profiles on a MAC // Fotospeed Tutorial** (3:24) - 565 views • 10 months ago

Installing Profiles on a PC.

- Start by saving your profile from the email to your desktop.
- Then go to your file explorer and locate the profile.
- Right click on the saved file, (the icon of this should show as an RGB triangle), and select the top option which is 'Install Profile'.
-
- If you have Photoshop/Lightroom/Elements open on your computer already, close and re-open them to refresh and bring the profile into the application.
-
- To find your profile in the future, go to your file explorer and enter into the search bar – ' C:\Windows\System32\spool\drivers\color ' which will take you to the profiles folder on your computer.
- To un-install your profile from your computer, go to the profile as shown in No.5 and delete it.

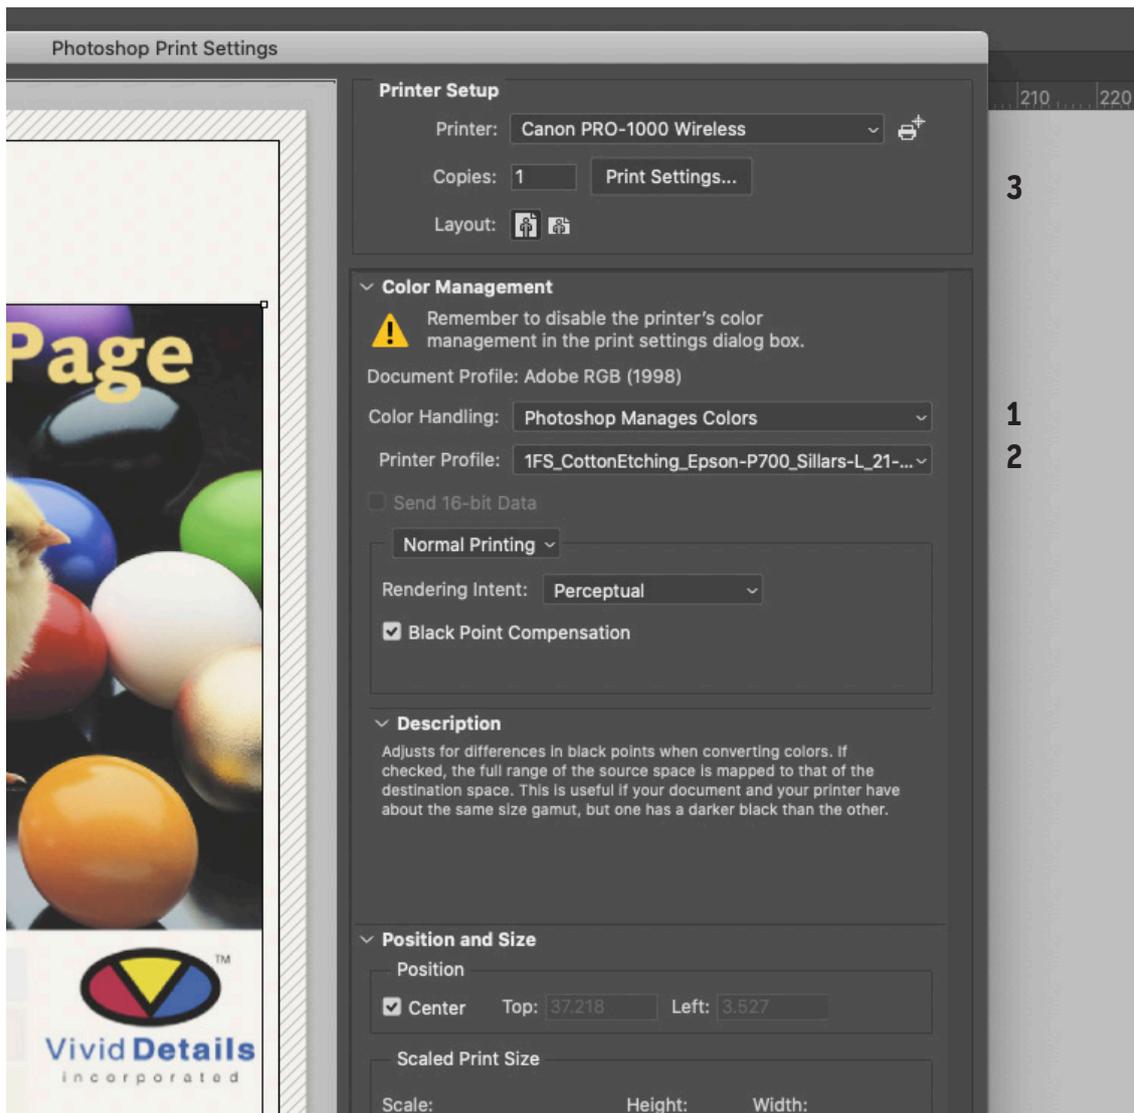

Installing Profiles on a MAC.

- Start by saving your profile from the email to your desktop.
- Then go to your Finder and go to the top of your screen where it will say 'Go'. On this drop down select 'Computer'.
- Within the finder box double click on 'Macintosh HD'
- You should now see four folders, double click on 'Library'
- Within the next window double click on 'Colorsync'
- Then double click on the profiles folder.
- Now drag your profiles into the profiles folder.
- The profiles will now be visible within your printing software.

Using your Profiles

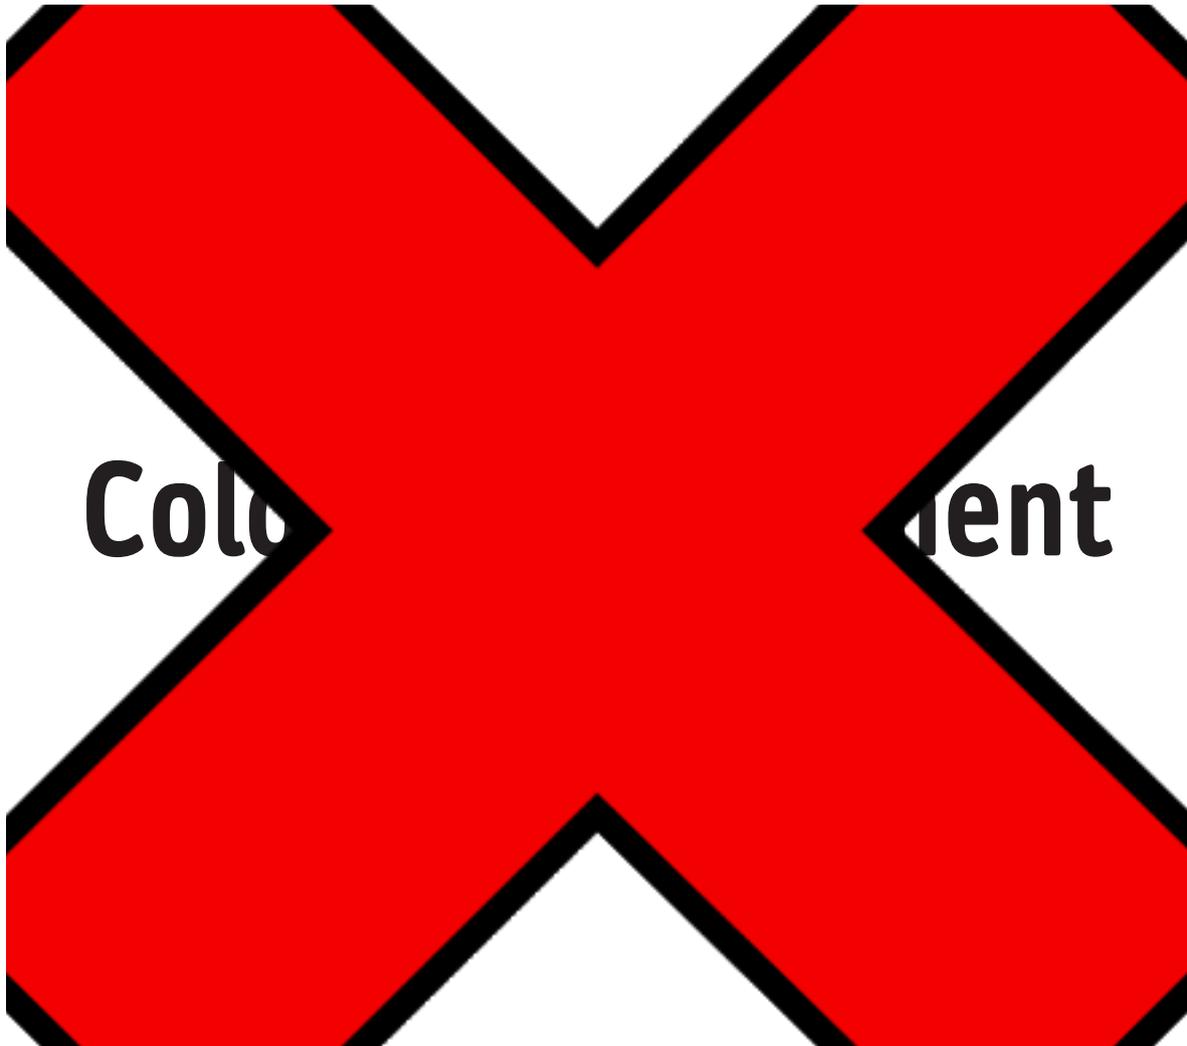

Photoshop.

To use the profiles within Photoshop you will need to:

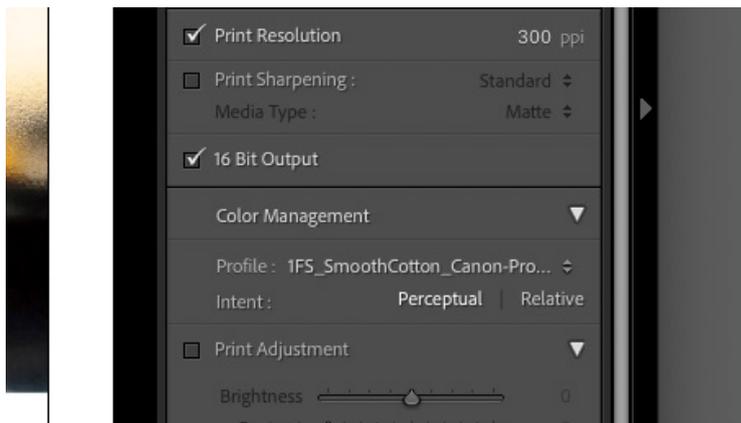

- Set 'Color Handling' to 'Photoshop manages colors'
- Under this select the profiles for your paper in the dropdown, N.B. All Fotospeed profiles start "1FS"
- The next step will be to enter Print Settings and set the media type and turn off color management as you did when printing the charts.

Always remember to turn off
Colour Management when
printing with a profile.

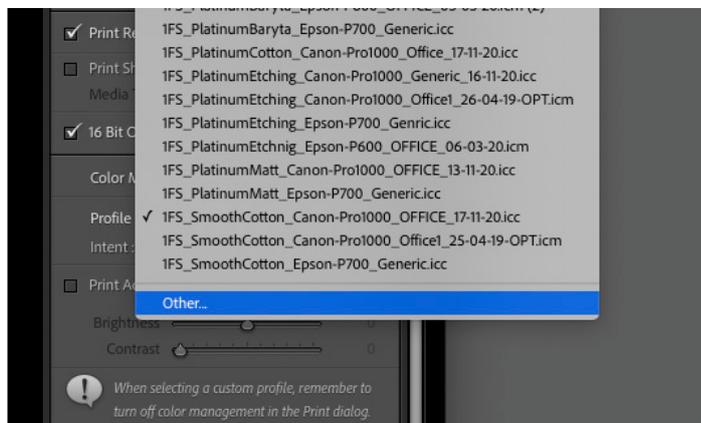

Using your Profiles

Lightroom

To use the profiles within Lightroom you will need to:

- Under the color Management section in the print tab click on the dropdown "Profile" menu.
- Within this dropdown select "Other"
- Tick the profiles you have installed from Fotospeed.
- The profiles will now show within the dropdown list under profiles.
- Now select the profile you'd like to use a click "Printer"
- From the "Printer menu" please set your media type and turn off Colour Management. As you did when printing the test chart.

Choose profiles to appear in the popup:
